

Policy for Contractor Software Use

Contractors are permitted to download oral genealogy related software (including but not limited to the Oral Genealogies mobile app, Legacy Family Tree genealogy software, and the Contractor Audit Tool (CAT)) on contractor-owned or personal laptops or mobile phones if they comply with the following conditions:

1. **Security:** Contractors are required to ensure all collected oral genealogy data on contractor-owned or personal laptops and mobile phones and related hardware are kept in a secure location and data is not accessible to those outside the contractor's organization.
2. **Auditing:** Contractors must comply with FamilySearch field auditors and allow them to audit all contractor-owned and personal devices on which FamilySearch software is installed.
